## Section 1—Identification: Product identifier and chemical identity

#### Product identifier

Product name: Shampoo&Conditioner

#### Recommended use of the chemical and restrictions on use

Recommended use: Hair cleaning

Restrictions on use: None identified.

#### Details of manufacturer or importer

Company: Reward Hospitality (ABN 40 010 183 669)

1 Arthur Dixon Court, Yatala 4207, QLD Australia

Telephone: +61 7 3441 5800

Network address: www.rewardhospitality.com.au

### Section 2—Hazard(s) identification

#### **EMERGENCY OVERVIEW**

This is a personal care or cosmetic product that is safe for consumers and other users under intended and reasonably foreseeable use. Additional information on toxicological endpoints is available from the supplier upon request.

#### Label elements, including precautionary statements

Hazard pictogram(s):

Signal word: WARNING

Hazard statement(s): Causes eye irritation

Precautionary statement(s): **Prevention:** 

Wash thoroughly after handling. Wear eye protection/face protection.

Response:

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

If eye irritation persists: Get medical advice/attention.

## Section 3 — Composition and information on ingredients

#### Mixture

| Name                        | CAS         |
|-----------------------------|-------------|
| Water (Aqua)                | 7732-18-5   |
| Sodium Laureth Sulfate      | 9004-82-4   |
| Cocoamidopropyl Betaine     | 61789-40-0  |
| Cocamide Methyl MEA         |             |
| Glycerin                    | 56-81-5     |
| Lauryl Glucoside            | 110615-47-9 |
| Coco-Glucoside              | 110615-47-9 |
| Sodium Chloride             | 7647-14-5   |
| Sodium Lactate              | 72-17-3     |
| Propylene Carbonate         | 108-32-7    |
| Fructooligosaccharides      |             |
| Disodium EDTA               | 139-33-3    |
| Citric Acid                 | 77-92-9     |
| Fragrance                   |             |
| Benzyl Alcohol              | 100-51-6    |
| Methylisothiazolinone       | 2682-20-4   |
| Methylchloroisothiazolinone | 26172-55-4  |
| Hexyl Cinnamaldehyde        | 101-86-0    |
| Limonene                    | 138-86-3    |
| Linalool                    | 78-70-6     |
| Geraniol                    | 106-24-1    |
| CI 19140                    | 1934-21-0   |
| CI 42090                    | 3844-45-9   |

### Section 4—First aid measures

#### Description of necessary first aid measures

If inhaled: Move victim to fresh air if safe to do so. If not breathing, apply artificial respiration and call

emergency medical services. Seek medical advice.

In case of skin contact: If skin problems occur, discontinue use. If symptoms persist, call a physician.

In case of eye contact: Use eyewash first aid facilities. Rinse with plenty of water for at least 15 minutes. Seek medical

advice.

If ingested: Do NOT induce vomiting. Rinse mouth with water. Seek medical advice.

#### Medical attention and special treatment

Treat symptomatically.

August 28, 2024

Page 3 of 6

### Section 5 — Firefighting measures

#### Suitable extinguishing equipment

Small Fire: Dry chemical, CO2 or water spray.

Large Fire: Dry chemical, CO<sub>2</sub>, alcohol-resistant foam or water spray. Move containers from fire area if

you can do it without risk.

#### Specific hazards arising from the chemical

Contact with molten substance may cause severe burns to skin and eyes. Avoid direct contact with hazardous chemical. Effects of contact or inhalation may be delayed. Fire may produce irritating, corrosive and/or toxic gases. Runoff from fire control or dilution water may cause pollution.

#### Special protective equipment and precautions for firefighters

Wear positive pressure self-contained breathing apparatus (SCBA). Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Effects of contact or inhalation may be delayed.

#### Section 6 — Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

Wear protective clothing and respiratory protection. Avoid breathing vapours, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas.

#### **Environmental precautions**

Do not let product enter drains. See Section 12.

#### Methods and materials for containment and cleaning up

Soak up with inert absorbent material and dispose of as hazardous waste. Avoid generating dust. Keep in suitable, closed containers for disposal.

## Section 7—Handling and storage, including how the chemical may be safely used

#### Precautions for safe handling

Eating, drinking and smoking in work areas is prohibited. Wash hands after use. Remove contaminated clothing and protective equipment before entering eating areas.

#### Conditions for safe storage, including any incompatibilities

Safe storage: Keep container tightly closed in a dry and well-ventilated place.

Incompatibilities: Strong acids and bases. Strong oxidising agents.

## Section 8 — Exposure controls and personal protection

#### **Exposure control measures**

Mixture. No known Australian exposure standards or national occupational exposure limits set for relevant ingredients.

#### **Biological monitoring**

Data not available.

#### **Control banding**

Data not available.

August 28, 2024

Page 4 of 6

#### ngineering controls

Use only in a well-ventilated area. Provide appropriate exhaust ventilation at places where natural ventilation is not sufficient.

#### Individual protection measures, for example personal protective equipment (PPE)

Eye/face protection: Safety glasses. Use equipment for eye protection tested and approved under appropriate government

standards.

Skin protection: Handle with gloves. Gloves must be inspected prior to use. Use proper glove removal technique

(without touching glove's outer surface) to avoid skin contact with this product. Dispose of

contaminated gloves after use. Wash and dry hands.

Body protection: Complete suit protecting against chemicals. The type of protective equipment must be selected

according to the concentration and amount of the dangerous substance at the specific workplace. Where risk assessment shows air-purifying respirators are appropriate use a full-face particle

Respiratory protection: respirator type or respirator cartridges as a backup to engineering controls. If the respirator is the

sole means of protection, use a full-face supplied air respirator. Use respirators and components

tested and approved under appropriate government standards.

## Section 9—Physical and chemical properties

| Test items                | SALES SPECIFICATION   |
|---------------------------|---|
| Appearance                | No foreign body   |
| Colour                    | Conform to the provisions of the color  |
| Odour                     | Conform to the provisions of scent  |
| Heat -resisting           | $(40\pm1)~^{\circ}\text{C}$ , twenty-four hours , After recovery at room temperature, , no stratification |
| Cold- resisting           | $(-8\pm2)$ °C, twenty-four hours, After recovery at room temperature, no stratification                   |
| рН                        | 4.0-9.0   |
| Foam                      | ≥100 mm   |
| Viscosity<br>(25°C)       | ≥5000 mPa • S   |
| Total bacteria Count      | ≤1000cfu/g  |
| Yeast&mold Yeasts & Molds | ≤100cfu/g   |
| Fecal coliform            | Not Detected  |

## Section 10—Stability and reactivity

#### Reactivity

Data not available. Unlikely to react under conditions of intended use.

#### **Chemical stability**

Stable under recommended storage conditions.

#### Possibility of hazardous reactions

Alkalis reacts exothermically with acids and can initiate the polymerization of certain classes of organic compounds.

#### Conditions to avoid

August 28, 2024

Page 5 of 6

Avoid contact with foodstuffs. Avoid exposure to heat. Avoid exposure to direct sunlight.

#### **Incompatible materials**

Strong acids, strong bases and strong oxidizing agents.

#### Hazardous decomposition products

Hazardous decomposition products formed under fire conditions. May include toxic and irritating oxides of carbon or nitrogen.

### Section 11—Toxicological information

Acute toxicity: Data not available.

Skin corrosion/irritation: Data not available.

Serious eye damage/irritation: Causes eye irritation

Respiratory or skin sensitisation: Data not available.

Germ cell mutagenicity: Data not available.

Carcinogenicity: Data not available.

Reproductive toxicity: Data not available.

Specific Target Organ Toxicity (STOT)—single exposure: Data not available.

Specific Target Organ Toxicity (STOT)—repeated exposure: Data not available.

Aspiration hazard: Data not available.

### Section 12 — Ecological information

Ecotoxicity: Data not available. Avoid contaminating waterways.

Persistence and degradability: Data not available. Expected to be biodegradable in water. Bioaccumulative potential: Data not available. Not expected to be bioaccumulate.

Mobility in soil: Data not available. Other adverse effects: Data not available.

### Section 13 — Disposal considerations

#### Disposal methods

Refer to local government authority for disposal recommendations. Dispose of contents/container in accordance with local/regional/national/international regulations.

August 28, 2024
Page 6 of 6

## Section 14—Transport information

UN number: Not regulated.

Proper shipping name or technical name: Not regulated.

Transport hazard class: Not regulated.

Packing group number: Not regulated.

Special precautions for user: Date not regulated.

Additional information: Date not regulated.

Hazchem or emergency action code: Not regulated.

## Section 15 — Regulatory information

Standard for the Uniform Scheduling of Medicines and Poisons

Ingredients not listed.

Carcinogen classification under WHS Regulation 2011, Schedule 10

Ingredients not listed.

**National Inventories** 

AICS: On the inventory, or in compliance with the inventory

## Section 16—Any other relevant information.

This SDS summarises to our best knowledge at the time of issue, the chemical health and safety hazards of the material. It is believed to be correct but does not represent any guarantee of the properties of the material and shall be used only as a guide. We cannot anticipate or control the conditions under which the product may be used, and each user must assess and control the risks arising from the use of the material.
